Performance Management & Professional Learning

Outcome

Participants will take-away new tools and ideas for strengthening performance management to nurture a culture of professional growth.

Session Blurb

Join our first live session in the Planning and Evaluating PD community! We'll explore how to make performance management a continuous, growth-focused conversation rather than a one-time event. We'll use two protocols to ensure you can share your experiences and learn from peers. Together, we'll uncover practical tools and ideas so that you walk away with actionable strategies that not only enhance appraisals but also support ongoing professional development. Don't miss this chance to collaborate, learn, and make a lasting impact on the learning culture of your school!
